5AI

RISKS

Risk warning.

5AI price targets are estimates, not guarantees. Markets and investments involve risk, including the total loss of principal. Past performance does not indicate future results.

All content, analytics, charts, market data and statements are for general information only. They are not legal, tax, accounting, medical, financial or investment advice, and they are not an offer or solicitation to buy or sell any security, asset or digital value instrument.

Win rate describes historical walk-forward tests of whether a candle range contained the target. It does not predict future results.

Targets of 3 years and 9 years are scenarios. They cannot be fully tested against history.

Forward-looking statements reflect current expectations and involve risks and uncertainties beyond the control of 5AI. Actual results may differ materially. 5AI has no duty to update them.

5AI is a startup. Services are in private alpha and may change, pause or end at any time.

Consult your own licensed advisors before acting. You are solely responsible for your decisions. Read the Risk Warnings at 5ai.us/risks.

5AI

ARTIFICIAL INTELLIGENCE

AI notice.

5AI products, services and content are built and operated with the help of artificial intelligence and automated systems, with little or no human review in some cases.

Automated systems can be inaccurate, incomplete, outdated, biased or unexpected, and can fail without warning. Outputs may differ each time.

Verify every output before relying on it. Do not rely on any output for legal, financial, investment, tax, medical or safety decisions.

Expert System inputs from qualified users improve the intelligent system. They do not make outputs guaranteed.

To the maximum extent permitted by law, 5AI is not liable for automated outputs or actions. Read the Terms at 5ai.us/terms.

TERMS

Terms in brief.

Use of 5AI services is governed by the Preliminary and Temporary Agreement (PTA) and its policies: Terms, Privacy, Copyright, Cookies and Risk Warnings, at 5ai.us.

Users must be 18 or older and have legal authority to accept the agreement.

The license is limited, revocable, non-exclusive and for personal or internal use. Resale, redistribution, scraping, data mining and reverse engineering are not permitted.

Fees are listed on pricing pages. Prices are approximate. Fee changes take effect on 7 days notice and do not change a price locked for a paid term. Unused funds are refundable as stated in the plans terms.

Liability is limited to the amount paid for the specific service in the prior 12 months. For free services the limit is zero.

Disputes go to individual binding arbitration under AAA rules. Class actions and jury trials are waived. Wyoming law applies.

5AI may amend the PTA at any time. Continued use means acceptance. Full text: 5ai.us/terms.

CONTACT

Communications policy.

5AI reviews video messages only. Record a 1-minute video, upload it to YouTube as Unlisted, and email the link with your message to team@xory.us. Messages without a video link are not reviewed and may not receive a reply.

5AI does not give interviews, provide comments, or respond to press and media inquiries.

5AI does not disclose non-public information about customers, investors, employees or business arrangements, and neither confirms nor denies it.

Do not include confidential or personal information in your message or video. A message does not create a confidential relationship, contract or duty unless a written agreement signed by both parties says so.

Messages are used only to respond to you and are handled under the Privacy Policy. Only statements on official 5AI pages are official statements.

Phone: +1 (415) 952-7773. Mail: 5 Thomas Mellon CIR STE 153, San Francisco CA 94134 US.

Application, Verification and Access

Access to paid 5AI products requires an application. Every applicant must apply and be approved before use. Approval is not a right. An application may be approved or denied, and 5AI is not required to give a reason for either decision.

To apply, send a short video of less than 1 minute for human verification. Upload the video to YouTube or send it by mail, and email the link or file with your message to team@xory.us. Applications without a video are not reviewed.

Encrypted review. All application information is encrypted with a key controlled by the applicant. The applicant unlocks the information for 72 hours. During that time 5AI reviews it and approves or denies the application. 5AI then deletes the application information. The applicant may delete the application at any time. After approval the applicant may lock the information again. 5AI recommends that applicants keep their approved record, encrypted, so that access can be verified again.

Application fee. Every paid plan carries a one-time application fee of roughly 10% of the one month price of the plan, rounded to a whole dollar, with a minimum of $2 and a maximum of $100,000. The Basic plan has no fee. The fee is paid with the application and is not refundable. If the application is denied, the fee is not returned. The fee is stated before payment. Fees may change.

An applicant with 3 consecutive rejections is no longer eligible to apply.

5AI reserves the right to deny, suspend or end access to any product, to any person or entity, at any time, at its sole discretion, with or without reason, to the maximum extent permitted by law.

Government employment disclosure. Any applicant who is, or has been, employed by a government entity in any country, directly, indirectly or as a contractor, must state this in the application video. This includes work for any national, regional or local government, ministry, agency, state-owned enterprise or public body. Such applicants should also provide further proof of the facts stated and the source and origin of their funds.

Applicants must be 18 or older, must have legal authority to accept these terms, and must provide information that is true, complete and current. False or misleading statements are grounds for denial or termination.

Application, Verification and Access (continued)

Each applicant remains responsible for compliance with all laws that apply to them.

5AI TERMS

Plans, Machines, Prices and Refunds

5AI offers a free Basic plan and paid plans. Plans differ by the number of connected machines, the number of tickers and the features included. One user may connect several machines up to the limit of the plan. A machine is a device registered to the account.

Prices shown on 5AI pages and documents are approximate. They may be lower or higher at the time of purchase, except for the Max plan, which is priced as stated in its written agreement.

Plans are offered for 1 month, 12 months, 36 months and 9 years, paid upfront. The price for a single month is the highest. Longer terms cost less per month. The price paid for a term is locked for that term.

No automatic renewal. 5AI does not renew any plan automatically and does not charge any payment method without a new order. When a term ends, access ends. To continue, the customer orders again at the price then in force, which may be higher, and 5AI may ask for a new application.

5AI may add tickers over time. Institutional plans may request tickers. 5AI decides whether to add a requested ticker.

Refunds. Funds paid for service that has not been used are refundable. If 5AI ends access or terminates a customer, the remaining unused funds are refunded from the day of termination, less any amount required by law to be withheld. The application fee is not refundable.

HXA digital value. Where 5AI makes it available, a customer may choose to pay with HXA digital value. The customer receives roughly 10% more usage or roughly 10% lower prices on products paid this way. The rate is published at purchase and may change. HXA is a separate entity. Digital value can lose value.

Fee changes take effect on 7 days notice and never change a price already locked for a paid term.

5AI serves its customers with limited assets and capacity. 5AI may limit, pause or change products and capacity at any time. Services are in private alpha.

Safety, Security, Privacy and Confidentiality

The goal of 5AI is safety, security, privacy and confidentiality. The customer comes first.

All user information is encrypted. Access is limited to the people who need it for the stated purpose. 5AI does not sell user information.

Application information is reviewed by a person, only while the applicant has unlocked it, for no more than 72 hours. 5AI does not create face or voice templates from application videos. Application information is deleted after review, and the applicant may delete it at any time.

Do not include confidential or personal information that is not requested in a message or video.

No system is completely secure. Read the Privacy Policy and Security Policy at 5ai.us.

No Agents and No Automated Access

For security, 5AI does not allow artificial intelligence agents, bots, scrapers or other automated access to its products or data on any plan, except as stated below.

Only the Max plan may use agents, and only for the limited actions stated in its written agreement. Any other use is a violation of the terms and may lead to immediate termination.

Users remain responsible for every action taken by any tool or agent they run.

5AI TERMS

No Recommendation. Use at Your Own Risk

5AI recommends its products to no person and to no entity. No person or entity should use 5AI products on the basis of any statement by 5AI. Use is allowed only after approval, and only at your own risk.

Price targets, ratings, levels, charts and all other outputs are estimates. They are not guarantees, advice, offers or solicitations. Markets involve risk, including the total loss of principal. Past performance does not indicate future results. Win rate is a historical measure and does not predict future results.

You alone decide whether to act. You alone bear every gain and loss that follows. Verify every output before relying on it and consult your own licensed advisors.

5AI may terminate any customer at any time. From the day of termination the remaining unused funds are refunded as described in these terms.

5AI is a startup. It may become insolvent or stop operating, and this may be beyond its control.

Use in Other Countries

5AI products are offered from the United States. Users in other countries are solely responsible for following the laws and regulations of their own country and place of residence. 5AI does not monitor, interpret or guarantee compliance with foreign law.

All users must also follow the laws of the United States that apply to them, including sanctions and export control laws, and must act in good faith and bona fide.

Where local law prohibits or restricts the use of a product, the product must not be used. 5AI may block access from any location at any time.

Nothing on any 5AI page is an offer or solicitation in any place where it would be unlawful.
